No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 29

NUMBER 1, OCTOBER 1982

REVIEW ARTICLE

H. BABICH. Butylated Hydroxytoluene (BHT): A Review. 1

D. J. SPEDDING AND R. B. HAMILTON. Adsorption of Mercury Vapor by Indoor Surfaces. 30

M. H. WONG. Metal Cotolerance to Copper, Lead, and Zinc in *Festuca rubra*. 42

J. P. WOJCIECHOWSKI, P. KAUR, AND P. S. SABHARWAL. Induction of Ouabain Resistance in V-79 Cells by Four Carbamate Pesticides. . . 48

OLE ANDERSEN, INGA HÄGERSTRAND, AND GUNNAR F. NORDBERG. Effect of the Chelating Agent Sodium Tripolyphosphate on Cadmium Toxicity in Mice. 54

ZIRO NAMBU AND EIJI YOKOYAMA. Experimental Suppression of Tolerance to Ozone and of Cross-Tolerance (NO_2-O_3) in Rats by Actinomycin D and Colchicine. 62

RONALD L. WILLIAMS AND JEAN L. MUHLBAIER. Asbestos Brake Emissions. 70

ARIAN ZARKOWER, MARY LOU ESKEW, WILLIAM J. SCHEUCHENZUBER, AND JUDITH A. GRAHAM. Effects of Fly Ash Inhalation on Murine Immune Function: Changes in Macrophage-Mediated Activities. . . 83

RAMA V. PADMANABHAN, SESHAGIRI RAO GUDAPATY, IRVIN E. LIENER, AND JOHN R. HOIDAL. Elastolytic Activity in the Lungs of Rats Exposed to Cadmium Aerosolization. 90

JOSEPH J. CHANDA, HENRY A. ANDERSON, ROMAN W. GLAMB, DIANE L. LOMATCH, MARY S. WOLFF, JOHN J. VOORHEES, AND IRVING J. SELIKOFF. Cutaneous Effects of Exposure to Polybrominated Biphenyls (PBBs): The Michigan PBB Incident. 97

RALPH R. FRERICHS, ELIZABETH M. SLOSS, AND KENNETH P. SATIN. Epidemiologic Impact of Water Reuse in Los Angeles County. . . . 109

K. KOLEV. Experimentally Induced Mesothelioma in White Rats in Response to Intraperitoneal Administration of Amorphous Crocidolite Asbestos: Preliminary Report. 123

R. E. BOLTON, J. M. G. DAVIS, AND D. LAMB. The Pathological Effects of Prolonged Asbestos Ingestion in Rats. 134

I. SPERLINGOVÁ, V. KUJALOVÁ, AND E. FRANTÍK. Chronic Carbon Disulfide Exposure and Impaired Glucose Tolerance. 151

H. James Harmon and Mark R. Sanborn. Effect of Naphthalene on Respiration in Heart Mitochondria and Intact Cultured Cells. . . . 160

Ismo J. M. Nuuja and Antti U. Arstila. On the Response of Mouse Peritoneal Macrophages to Titanium Dioxide Pigments *in Vitro*. . . 174

Erminio Giavini, Mariangela Prati, and Claudio Vismara. Effects of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin Administered to Pregnant Rats during the Preimplantation Period. 185

P. Asokan and C. R. Krishna Murti. Effect of Preweaning Undernutrition on Cadmium-Induced Metallothionein Levels in Liver and Cadmium Distribution in Different Tissues. 190

Thomas F. Gale. The Embryotoxic Response to Maternal Chromium Trioxide Exposure in Different Strains of Hamsters. 196

Allan R. Magie, David E. Abbey, and Willard R. Centerwall. Effect of Photochemical Smog on the Peripheral Lymphocytes of Nonsmoking College Students. 204

William S. Linn, Ronald M. Bailey, Deborah A. Shamoo, Theodore G. Venet, Leonard H. Wightman, and Jack D. Hackney. Respiratory Responses of Young Adult Asthmatics to Sulfur Dioxide Exposure under Simulated Ambient Conditions. 220

Rose M. Morgan, Yashdev R. Kundomal, and Eugene W. Hupp. SAS Probit Analysis for Cadmium Mortality. 233

Cesare Maltoni, Franco Minardi, and Leonildo Morisi. Pleural Mesotheliomas in Sprague–Dawley Rats by Erionite: First Experimental Evidence. 238

Book Review. 245

Number 2, December 1982

Review Article

G. M. Christensen, D. Olson, and B. Riedel. Chemical Effects on the Activity of Eight Enzymes: A Review and a Discussion Relevant to Environmental Monitoring. 247

B. D. Carlton, M. B. Beneke, and G. L. Fisher. Assessment of the Teratogenicity of Ammonium Vanadate Using Syrian Golden Hamsters. 256

M. K. Halbert, M. K. Mazumder, and R. L. Bond. Inhalation Simulation and the Effects of Lung Environmental Conditions on Consumer Aerosol Products and NaCl Aerosol. 263

M. L. Miller, M. J. Radike, A. Andringa, and E. Bingham. Mitochondrial Changes in Hepatocytes of Rats Chronically Exposed to Vinyl Chloride and Ethanol. 272

Hidekazu Fujimaki, Fujio Shimizu, and Kentaro Kubota. Effect of Subacute Exposure to NO_2 on Lymphocytes Required for Antibody Responses. 280

Antti Zitting, Heikki Savolainen, and Juha Nickels. Biochemical and Toxicological Effects of Single and Repeated Exposures to Polyacetal Thermodegradation Products. 287

Raymond Singer, Marion Moses, José Valciukas, Ruth Lilis, and Irving J. Selikoff. Nerve Conduction Velocity Studies of Workers Employed in the Manufacture of Phenoxy Herbicides. 297

E. Azoulay-Dupuis, G. Bouley, and M. C. Blayo. Effects of Sulfur Dioxide on Resistance to Bacterial Infection in Mice. 312

Michael J. Thun, Michael F. Lakat, and Ronald Altman. Symptom Survey of Residents of Homes Insulated with Urea–Formaldehyde Foam. 320

H. Babich and G. Stotzky. Nickel Toxicity to Microbes: Effect of pH and Implications for Acid Rain. 335

U. Ewers, R. Stiller-Winkler, and H. Idel. Serum Immunoglobulin, Complement C3, and Salivary IgA Levels in Lead Workers. 351

Tomotoshi Akematsu, Ronald F. Dodson, Marion G. Williams, Jr., and George A. Hurst. The Short-Term Effects of Volcanic Ash on the Small Airways of the Respiratory System. 358

Mogens Unger, Jørn Olsen, and Jørgen Clausen. Organochlorine Compounds in the Adipose Tissue of Deceased Persons with and without Cancer: A Statistical Survey of Some Potential Confounders. 371

Ping C. Hu, Frederick J. Miller, Mary J. Daniels, Gary E. Hatch, Judith A. Graham, Donald E. Gardner, and Maryjane K. Selgrade. Protein Accumulation in Lung Lavage Fluid following Ozone Exposure. 377

T. W. Schultz, J. N. Dumont, T. K. Rao, M. R. Guerin, C. Y. Ma, and J. L. Epler. Evaluation of Hydrotreatment as a Means of Reducing Biological Activity of Synfuel Related Materials. 389

Bruce W. Case, Ronald E. Gordon, and Jerome Kleinerman. Acute Bronchiolar Injury following Nitrogen Dioxide Exposure: A Freeze Fracture Study. 399

K. Donaldson, J. M. G. Davis, and K. James. Characteristics of Peritoneal Macrophages Induced by Asbestos Injection. 414

Göran Pershagen, Birger Lind, and Nils-Erik Björklund. Lung Retention and Toxicity of Some Inorganic Arsenic Compounds. . . 425

Louis W. Chang, Teresa M. Tiemeyer, Galen R. Wenger, Donald E. McMillan, and Kenneth R. Reuhl. Neuropathology of Trimethyltin Intoxication. I. Light Microscopy Study. 435

Louis W. Chang, Teresa M. Tiemeyer, Galen R. Wenger, Donald E. McMillan, and Kenneth R. Reuhl. Neuropathology of Trimethyltin Intoxication. II. Electron Microscopic Study on the Hippocampus. 445

Ellen K. Silbergeld, Robert E. Hruska, Diane Bradley, Joel M. Lamon, and Bruce C. Frykholm. Neurotoxic Aspects of Porphyrinopathies: Lead and Succinylacetone. 459

Announcements. 472

Author Index for Volume 29. 473

Cumulative Subject Index for Volumes 27–29. 475

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines now concerned with man-environmental relationships; it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to any member of the Board of Editors or to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029. Further, prior review of the paper may be undertaken with a member of the Board of Consulting Editors, especially one with particular competence in the area concerned (as, environmental physiology, epidemiology and biostatistics, ecology, occupational medicine, toxicology, anthropology, climatology, air pollution, environmental medicine, geophysics, etc.); this will often expedite consideration of the paper.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. It is preferable that papers be submitted in English to ensure faithfulness to the author's meaning. If necessary, however, a translation will be arranged.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Acknowledgments* and *References* is recommended. However, variations of this format are acceptable if they provide clearer expression of the subject. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures and Tables. Number all figures consecutively with arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 per cent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½″ × 11″; grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints (5″ × 7″ or 8″ × 10″) with strong contrasts. X-rays should be right-reading glossy prints.

Tables are to be typed on separate pages and numbered with arabic numerals; a table title should be included.

Footnotes. Footnotes in the text are identified by superscript *numerals* and listed on a separate sheet; in the *tables* by superscript *letters* and placed at the bottom of the table.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically at the end of the paper in the following order:

Curry, A. S. (1963). Acidic and neutral poisons. *In* "Progress in Chemical Toxicology" (A. Stolman, Ed.), Vol. 1, pp. 135–155, Academic Press, New York.

Waller, R. E., Commins, B. T., and Lawther, P. J. (1965). Air pollution in a city street. *Brit. J. Industr.* **22**, 128–138.

The names of journals should be abbreviated according to the *Index Medicus* or Chemical Abstracts' *Service Source Index*. Include in the reference list articles that are "in press," but incorporate in the text or use footnotes for "manuscript in preparation," "personal communication," or "unpublished observations."

Reprints. A reprint order form will accompany galley proofs. The senior author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, N.Y. 10029. Business correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Production Department, 111 Fifth Avenue, New York, N.Y. 10003.
